EVENTIDE UPDATES BD600 BROADCAST DELAY FAMILY

2X the delay time in MicroPrecision mode, improved audio quality, and USB added

LAS VEGAS — April 24, 2017 — Eventide has updated its industry standard broadcast delay products. Introducing the BD600+, featuring double the delay time in Precision Delay mode, now 20 seconds of delay, adjustable in microsecond increments in real time with no audible artifacts. The BD600+ also features USB as well as RS232 for remote control and improved audio performance (>110dB S/N A to A). The BD600W+ offers Wheatnet IP integration, and the BD600E+ features extended remote capability for integration with automation systems. The BD600+ family of broadcast delays provide unsurpassed performance and the proven reliability you have come to expect from Eventide. Available now from Eventide broadcast dealers.
